This Agency is authorized to require, pursuant to Illinois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed \$25,000 per day of violation. Falsification of this information may result in a fine up to \$50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

COPY 6. GENERATOR'S COPY

In case of a spill call the Illinois Office of Emergency Response at 217/782-7860 and the National Response Center at 800/424-8802 or 202/426-2675.

*The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. Potentially Infectious Medical Waste (PIMW) requires a PIMW manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of Copy 1 should be used.*

#### INSTRUCTIONS TO GENERATORS (Please type)

1. Enter generator's USEPA twelve digit identification number\* and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
2. Enter total number of pages comprising this Manifest.
3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5, 6. For the first transporter who will transport the waste, enter the C, D. company name, USEPA ID number\*, Illinois EPA four digit Special Waste Hauling (SWH) Permit number or the Uniform Program I.D. number issued by the participating state, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

- 7, 8. If applicable, enter the information requested for the second E, F. transporter who will transport the waste.
- 9, 10. For the facility designated to receive the waste, enter company G, H. name, address, USEPA ID Number\*, Illinois EPA ten digit identification number, and telephone number where an authorized agent of the receiving facility may be reached.

11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT".

#### \* REQUIRED ONLY FOR HAZARDOUS WASTE

12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:  
 CM = Metal boxes or roll offs      DM = Metal drums  
 CW = Wooden boxes                  DW = Wooden drums  
 CF = Fiberboard or plastic bags      DF = Fiberboard or plastic drums  
 BA = Burlap, cloth, paper or plastic bags.  
 CY = Cylinders                          TT = Tank Trucks  
 DT = Dump trucks                      TP = Tanks portable  
 TC = Tank cars

13. Enter the total quantity of each waste.
14. Enter unit of measure from list below:

G = Gallons	P = Pounds
T = Tons	Y = Cubic Yards
L = Liters	K = Kilograms
M = Metric tons	N = Cubic meters

1. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - additional numbers should be listed in Section J.

- J, K. If needed, enter additional description or information/instructions for the material listed in Item 11.
15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.
16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

**GENERATOR: RETAIN COPY 6. MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT IF WASTE IS RCRA HAZARDOUS OR PCB WASTE.**

**INSTRUCTIONS TO TRANSPORTER:** 17, 18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. *Upon delivery of waste to facility, retain Copy 4 and leave remaining copies with the facility owner/operator.*

#### INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.  
**RETAIN COPY 3, SEND COPY 1 TO THE GENERATOR, AND SEND COPY 2 TO ILLINOIS EPA WITHIN 30 DAYS OF THE DELIVERY IF WASTE IS RCRA HAZARDOUS OR PCB WASTE.**

*Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington D.C. 20503.*

## INSTRUCTIONS FOR COMPLETING THE LAB PACK INVENTORY

---

Each generator or packaging agent submitting lab pack inventories to Treatment One must use this form or another form which includes the same information. This form, when properly completed, will assist the generator in satisfying the Land Disposal Restriction Notification requirements so long as the lab pack inventory is submitted with each waste shipment. In order to simplify and reduce the time required to complete the land disposal restriction notification information, Treatment One has developed three tables which associate a letter code to subcategories (Table I) and numerical codes to F-Solvent Waste (Table II) and Underlying Hazardous Constituents (Table III). To ensure compliance with the notification provisions of 40 CFR 268.7, please be sure to keep a copy of these tables with your lab pack inventory.

1. In column 1, enter an item number for each initial entry in column 2.
2. In column 2, enter the chemical name for the contents of each inner container. If the inner container is a mixture of chemicals, please identify each constituent and the appropriate concentrations. Treatment One realizes that the generator or packaging agent will utilize more than one line for each inner container.
3. In column 3, specify the physical state of the material for each inner container S = solid, L = liquid, G = gas.
4. In column 4, enter the quantity of material in the inner container. For example, enter 1/2 pint for a pint container which is 1/2 full.
5. In column 5, enter the primary DOT hazard class.
6. If the chemical exhibits a subsidiary hazard, enter the subsidiary hazard(s) class in column 6 (i.e., Trichlorosilane has a primary hazard class of 4.3 and two subsidiary hazard classes 3 and 8.)
7. In column 7, enter the packing group for each inner container.
8. In column 8, enter the EPA hazardous waste number(s) associated with each inner container.
9. In column 9, if applicable, enter the appropriate subcategory code (A-E) identified in Table I. RCRA waste codes acceptable at Treatment One which have subcategories are D001, D002, D003, D006, D008, D009, P047, P065, P092, U151, U240, F003, and F005.
10. In column 10, if applicable, enter the numerical code (5-32) from Table II in order to identify specific F-code solvent(s) or the numerical code from Table III to identify any underlying hazardous constituents (UHC) associated with characteristic waste codes D001 (if the waste will not be managed by CMBST or RORGS), D002, and/or D018 through D043.
11. In column 11, enter the letters "WW" if the material of the inner container meets the definition of a wastewater, otherwise enter the letter "NWW" for nonwastewater. Wastewater is primarily defined as containing less than 1% total organic content (TOC) and less than 1% total suspended solids (TSS).

	50F	LP-9	OUT5801H		
	550M	LP-10	OUT5023H		

TOTAL NO. OF CONTAINERS
6

\*If you are an out of state generator, you may assign the Texas Waste Code which best describes the contents of the container in the following manner: Start with the sequence number OUTS, then add the form code (described below) and end with the classification code (described below). If the generating facility is located in Texas, assign the Texas Waste Code which best describes the contents of the container in the same manner as described above except you should assign an arbitrary 4 digit sequence number that will be used each time you ship a particular form of lab pack. If this will be the only time lab packs will be shipped from this facility, then form TWC0757 must be completed and submitted to the TNRCC. In this situation, the TNRCC will assign the Texas Waste Code.

#### FORM CODES

001 - Lab packs of old chemicals only  
002 - Lab packs of debris only  
003 - Mixed lab packs  
004 - Lab packs containing acute hazardous wastes  
009 - Other lab packs (Specify in Comments)

#### CLASSIFICATION CODES

H - Hazardous per RCRA  
1 - Class 1 (nonhazardous)

Packing Medium: Vermiculite ☒ Clay-based \_\_\_\_\_ Sawdust \_\_\_\_\_ Corn Cob (Slikwik) \_\_\_\_\_ Other: \_\_\_\_\_

Packing exemption, if any: DOT E- \_\_\_\_\_

Comments: \_\_\_\_\_

### CERTIFICATIONS

GENERATOR: I hereby certify that the items described in this summary and attached inventories are not radioactive, pathogenic or infectious and do not contain 2, 3, 7, 8-tetrachloro-p-dibenzodioxin (dioxin) or dibenzofurans. I further certify that all information submitted in this and all attached documents is complete and accurate, and that all known or suspected hazards have been disclosed. I understand that I am responsible for the representation of every container of waste material and that any misrepresented, unidentified, off-specification or unapproved containers may result in drum rejection, additional charges being assessed and/or materials being returned to generator.

SIGNATURE: Anita Boseman TITLE: OSC DATE: 09/27/02  
Printed Name: ANITA BOSEMAN

PACKAGING AGENT: I certify that all materials have been packaged in accordance with 40 CFR 173.12. by DOT hazard class, by chemical compatibility, by SET treatment code and by DOT packaging exemption listed above. I certify that any and all information necessary for specific representation of the waste has been disclosed on the attached inventories.

SIGNATURE: J.W. ON BEHALF OF SET TITLE: P.M. DATE: 09/27/02  
Printed Name: JIM WILLIAMS  
ON BEHALF OF SET

Copy distribution: white-T1; yellow-generator

The figure consists of two separate line graphs. The left graph plots 'Rate of reaction' on the y-axis against 'Temperature' on the x-axis. The curve starts at a low rate at low temperatures and rises linearly as temperature increases. The right graph also plots 'Rate of reaction' on the y-axis against 'Temperature' on the x-axis. This curve starts at a low rate at low temperatures, remains relatively flat for a short range, and then rises very steeply as temperature increases, indicating a significant change in the rate-determining step at higher temperatures.

## LAND DISPOSAL RESTRICTION FORM INSTRUCTIONS

If the generator determines that their waste is subject to the land disposal restrictions, the generator must notify the receiving facility (Treatment One). This form, when properly completed, will assist the generator in satisfying the notification requirements.

### COMPLETING THE LAND DISPOSAL RESTRICTION TABLE

Please complete one notification form for each manifest. Space is provided for 20 RCRA waste codes. If additional space is required use the notification continuation sheet. In order to simplify and reduce the time required in completing this form, Treatment One has developed three tables which associate a letter code to subcategories (Table I) and numerical codes to F-Solvent Constituents and Underlying Hazardous Constituents (Table II, III respectively). For regulatory compliance purposes, please be sure to keep a copy of these tables with your copy of the notification.

#### APPROVAL NUMBER (Column 1):

For each wastestream, enter the approval number assigned by Treatment One.

#### RCRA WASTE CODE (Column 2):

Enter all EPA hazardous waste numbers associated with each wastestream (one per line).

#### SUBCATEGORY CODE (Column 3):

If the RCRA waste code has a subcategory enter the appropriate letter code (A through E) identified in Table I (i.e., enter the letter A in column 3 for waste exhibiting the characteristic of ignitability which contains more than 10% total organic carbon (TOC)).

#### F-SOLVENT (Column 4):

If the waste is an F001-F005 spent solvent (other than 2-Nitropropane or 2-Ethoxyethanol), enter the number preceding the constituent name located in Table II.

#### UHC CODE (Column 4):

If the waste is classified as: D001 (and will not be managed according to the treatment technologies RORGS or CMBST), D002, D003 (except for the reactive sulfide and cyanide subcategories), and/or D004 through D043, and it contains any underlying hazardous constituents (UHC) which exceed the universal treatment standards (see 40 CFR 268.48), enter the numerical code preceding the constituent found in Table III.

#### TREATABILITY GROUP (Column 5):

Wastewater is primarily defined as containing less than 1% total organic carbon (TOC) and less than 1% total suspended solids (TSS). If the waste does not meet the definition of a wastewater enter "NWW" for nonwastewaters.

#### ADDITIONAL NOTIFICATION REQUIREMENTS (If Applicable)

If the waste is subject to the alternative treatment standards for soil or is a hazardous waste which currently meets the appropriate treatment standard contact your Treatment One Customer Service Representative for additional notification and certification requirements.

	30F	LP-9	OUT58014	
	550A	LP-10	OUT50234	

TOTAL NO. OF CONTAINERS
6

\*If you are an out of state generator, you may assign the Texas Waste Code which best describes the contents of the container in the following manner: Start with the sequence number OUTS, then add the form code (described below) and end with the classification code (described below). If the generating facility is located in Texas, assign the Texas Waste Code which best describes the contents of the container in the same manner as described above except you should assign an arbitrary 4 digit sequence number that will be used each time you ship a particular form of lab pack. If this will be the only time lab packs will be shipped from this facility, then form TWC0757 must be completed and submitted to the TNRCC. In this situation, the TNRCC will assign the Texas Waste Code.

#### FORM CODES

- 001 - Lab packs of old chemicals only
- 002 - Lab packs of debris only
- 003 - Mixed lab packs
- 004 - Lab packs containing acute hazardous wastes
- 009 - Other lab packs (Specify in Comments)

#### CLASSIFICATION CODES

- H - Hazardous per RCRA
- 1 - Class 1 (nonhazardous)

Packing Medium: Vermiculite ☒ Clay-based \_\_\_\_\_ Sawdust \_\_\_\_\_ Corn Cob (Slikwik) \_\_\_\_\_ Other: \_\_\_\_\_  
 Packing exemption, if any: DOT E- \_\_\_\_\_  
 Comments: \_\_\_\_\_

CERTIFICATIONS

GENERATOR: I hereby certify that the items described in this summary and attached inventories are not radioactive, pathogenic or infectious and do not contain 2, 3, 7, 8-tetrachloro-p-dibenzodioxin (dioxin) or dibenzofurans. I further certify that all information submitted in this and all attached documents is complete and accurate, and that all known or suspected hazards have been disclosed. I understand that I am responsible for the representation of every container of waste material and that any misrepresented, unidentified, off-specification or unapproved containers may result in drum rejection, additional charges being assessed and/or materials being returned to generator.

SIGNATURE: Anita Roseman TITLE: OSC DATE: 09/27/22  
 Printed Name: ANITA ROSEMAN

PACKAGING AGENT: I certify that all materials have been packaged in accordance with 40 CFR 173.12, by DOT hazard class, by chemical compatibility, by SET treatment code and by DOT packaging exemption listed above. I certify that any and all information necessary for specific representation of the waste has been disclosed on the attached inventories.

## LAND DISPOSAL RESTRICTION TABLE

[illegible]

I am supplying this notification to Treatment One in accordance with the provisions of 40 CFR 268.7. I have determined that the material described above is restricted from land disposal and must be treated to conformance with the treatment standards specified in 40 CFR 268.40 and 268.48.

I hereby certify that all information supplied above is complete and accurate to the best of my knowledge and ability to determine that no omissions or errors exist.

Public reporting burden for this collection of information is estimated to average 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden, to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.
